

FIRM PROFILE:

Castle Rock Recreation Center
Additions & Alterations
Castle Rock, Colorado

Architectural Engineering Design Group, Inc. (AEDG) was founded on the basis of providing architectural engineering services that exceed the expectations of our clients. The core values of the firm's ownership group are to provide comprehensive, timely, and fluid coordination during a project's design process. These coordination efforts result in solid construction documents, reports, and recommendations that are clear and concise. AEDG provides more than engineered solutions; we provide a smooth, proactive coordination process all along the way.

Tramontana
Telluride, Colorado

The members of AEDG have been involved in the design of hundreds of projects of a wide variety of uses. These projects are located across the United States and Internationally. The sizes of these facilities range from a smaller \$10,000 construction cost to over \$100,000,000 in overall construction cost. This work includes the design of municipality and privately owned recreation centers, large upscale mixed used condominium complexes, high end technology facilities, themed hotels, high profile single family custom residences, education facilities, retail environments, restaurants, and commercial office buildings and their tenants to name a few. The members of AEDG have been involved with the design of over two million square feet of recreation center facility space.

The integration of architecture and lighting is a fundamental part of every design that AEDG is involved with. Education at one of the nation's leading lighting design programs, as well as experience on a wide variety of project types has given this firm the foundation to develop the appropriate solution for any facility and its anticipated uses.

The Lofts at One Boulder Plaza
Boulder, Colorado

The firm is a strong advocate for sustainable design including experience with the International Energy Conservation Code, ASHRAE 90.1 standards and their implementation, Title 24 in California, specific local energy codes, and LEED™ accreditation and project history. AEDG is committed to maintaining a comprehensive knowledge base of the latest sustainable equipment and installation methods. This knowledge base adds value to every project but was especially useful when a member of the AEDG's team served as the electrical engineer and lighting designer of record for the first facility in Colorado to utilize Xcel's Energy Assistance program.

Members of AEDG have been published in articles contained within industry trade magazines including the Athletic Business Journal. These articles point to topics of sustainable energy solutions as they relate to lighting control, as well as methods for properly illuminating a natatorium environment.

Devil's Thumb Lodge
Tabernash, Colorado
