

Larson Incitti Architects
Denver, Colorado

Alyssa Weber is inspired by the technical and creative challenges involved in the lighting and electrical design process. She is passionate about creating clean, aesthetic solutions in every project. She has awareness for how light reacts with architecture and how the people within the space react to light. Alyssa is dedicated to the attention to detail that produces great design.

While earning her degree, Alyssa gained valuable experience with advanced lighting design and rendering software, daylighting analysis and controls and project coordination. She is committed to learning about new, sustainable solutions and technologies and adapting her design strategies to the changing demands and capabilities of the industry.

EDUCATION:

University of Colorado, Boulder
Bachelor of Science, Architectural Engineering
